

Progress Report template issues

1. I'm not able to clear the template name even though the cursor is available. I'm not able to do the manual clear – can be fixed

2. Why the page is loaded once the user clicks the close template? - Need to review with QA.

3. Columns are not getting adjusted. It is going into different shapes – not able to reproduce, requires more details.

Note: Copy/paste from sources outside of MeasurePM is not supported and can cause formatting issues.

Custom Properties ▾ | System Properties ▾ |    | Format ▾ | Font ▾ | Size ▾ | **B** *I* U ~~S~~   |     |   |    |   |   |   |   |   |   |   |   | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

B. I'm not able to do the manual cursor click

This needs to be discussed.

[illegible]

5. Check boxes are not clickable. It is taking the user to click 3 to 4 times . >>> Critical

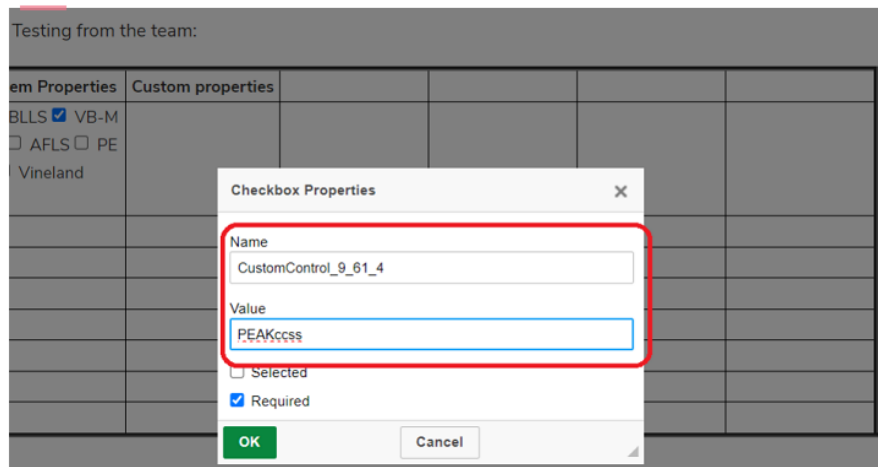

Raviraj will check, not sure if this can be resolved. Need to check if user can select checkbox on single click.

Table Testing from the team:

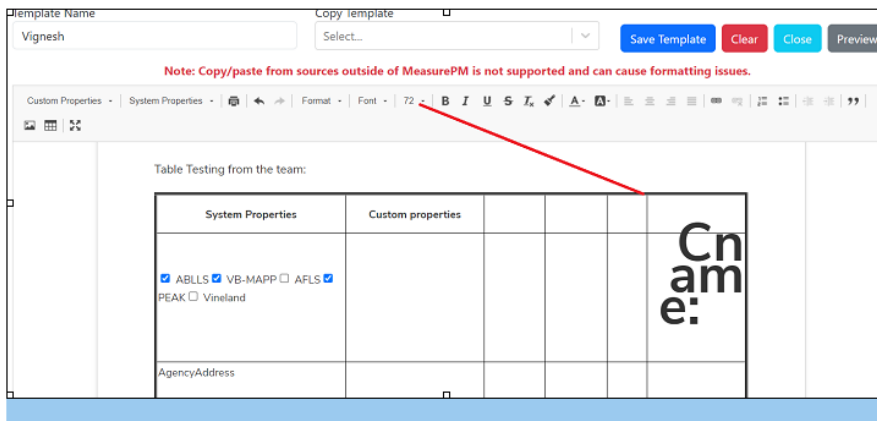

System Properties	Custom properties				
<input type="checkbox"/> ABLLS <input checked="" type="checkbox"/> VB-M <input type="checkbox"/> APP <input type="checkbox"/> AFLS <input type="checkbox"/> PE <input type="checkbox"/> AK <input type="checkbox"/> Vineland					

6. Why it is allowing the user to change the checkbox properties Info - need to make it disabled

Note from Efrat: This popup should not appear at all

7. Facing the alignment issue when the user increase the font size – need to check

8. Position is getting changed once the user change the font size from Default to arial – need to check

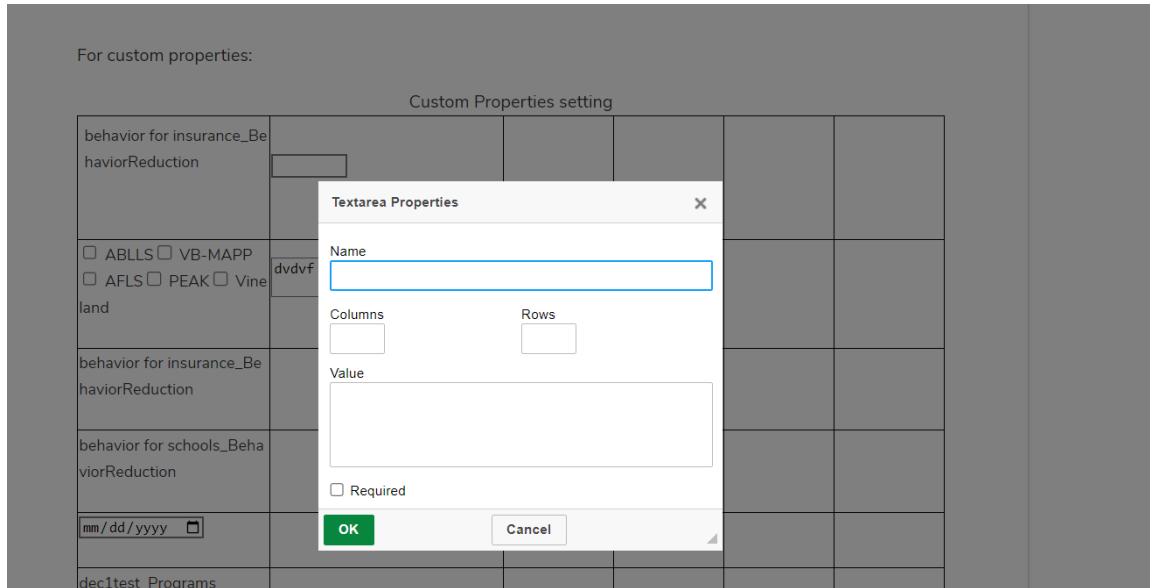

10. For the custom properties Text area >>> Edited text is not getting displayed – need to discuss with the reporter

Steps:

Add some text in the text area custom properties

Again do the double-click

Output: The added name is not displayed

11. Edit Text area is not working – this seems working

13. Not able to click the date picker . - limitation from ckEditor

Note from Efrat- Why was this not known or explained? What other custom properties are not supported?

haviorReduction					
behavior for schools_BehaviorReduction					
mm/dd/yyyy <input type="checkbox"/>					
mm/dd/yyyy <input type="checkbox"/>					
dec1test_Programs					

14. Why it is allowing the user to edit the values in the preview page.

Note from Efrat- this is fine with me. It is the same with soap note. User interacts with it, but nothing saves. I would consider this not an issue.

For custom properties:

behavior for insurance_BehaviorReduction	<input type="text"/>				
<input type="checkbox"/> ABLLS <input type="checkbox"/> VB-MAPP <input checked="" type="checkbox"/> AFLS <input type="checkbox"/> PEAK <input type="checkbox"/> Vineland	<input type="text" value="dvdv"/>				
behavior for insurance_BehaviorReduction	<input type="text" value="cc"/>				
behavior for schools_BehaviorReduction					
mm/dd/yyyy <input type="checkbox"/>					
mm/dd/yyyy <input type="checkbox"/>					
dec1test_Programs					

Custom Properties setting

15. I'm not able to stretch the text box.

Custom Report

3e	<input type="text"/>
ne	<input type="text" value="dvdf"/>
e	<input type="text"/>

16. Pop-up is getting opened for the multiple click

na	<input type="text" value="Select"/>
----	-------------------------------------

17. Custom property dropdown: Not able to edit the dropdown again. It is not taking me to the edit properties page

behavior for insurance_BehaviorReduction			
behavior for schools_BehaviorReduction	Programs_Program		
<div>mm/dd/yyyy </div> <div>mm/dd/yyyy </div>	<div><div>--Select--</div><div>test</div><div>test1</div></div>		
dec1test_Programs			

18: Selected dropdown is not getting displayed in the preview page

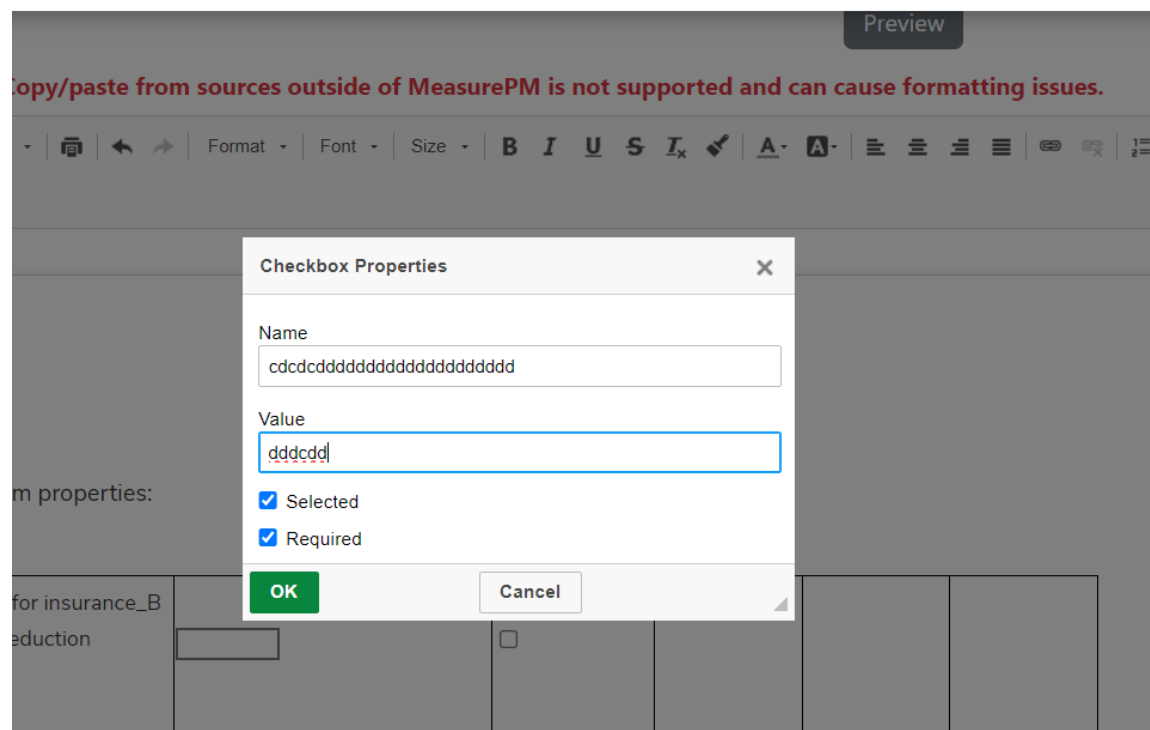

Programs_Program	
<div><div>--Select--</div><div>test</div><div>test1</div></div>	

19. Header is placing in downside in the preview page

Custom Properties setting				
---------------------------	--	--	--	--

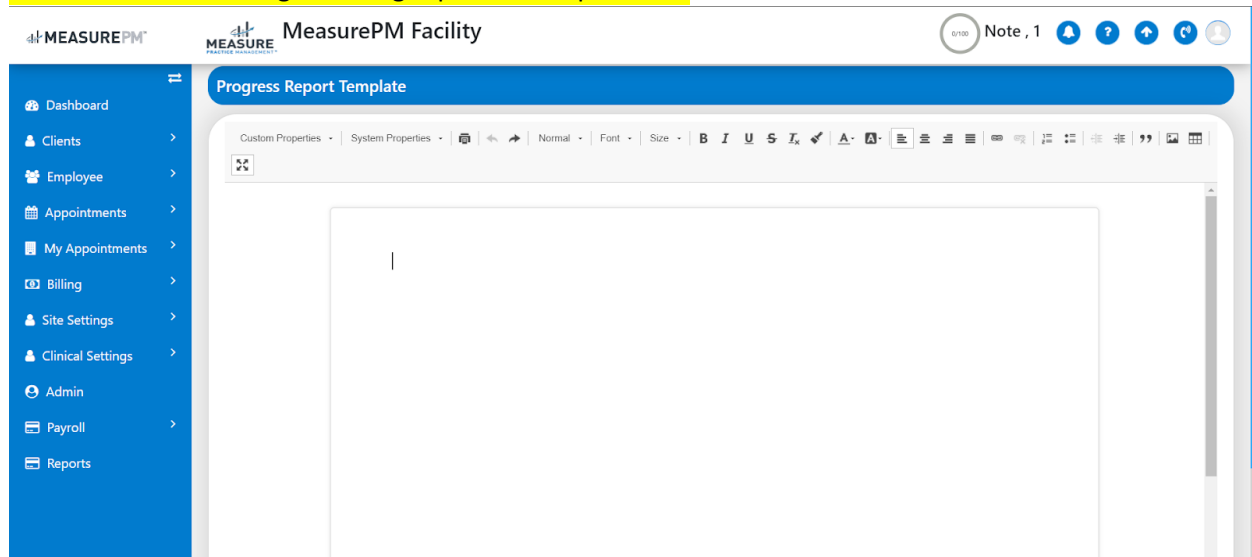

A screenshot of a web browser window titled "test2". The browser's address bar is empty. The main content area displays a green square button with the word "Sign" in white text, centered within a larger square frame. Below this frame is a text input field containing the text "Testing by vignesh". To the right of the input field is a button labeled "Click and drag to resize". The browser's status bar at the bottom shows "Page Not Indexed".

Note from Efrat: this popup should not even be here. Text goes directly into the custom property

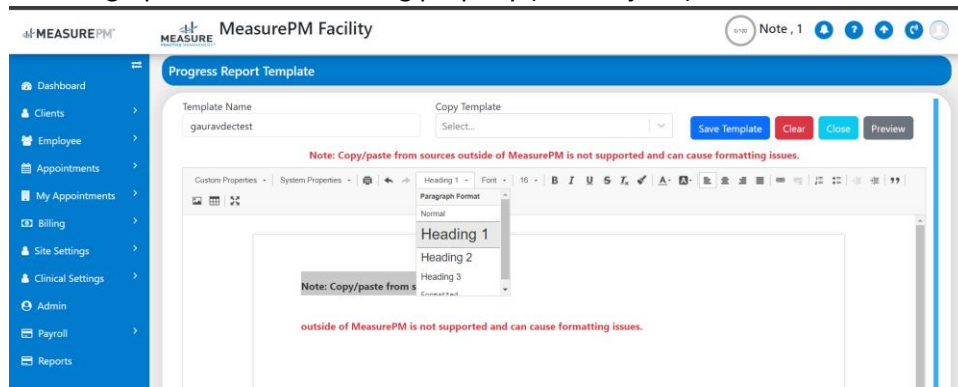

22. When maximized, the upper button become hidden.(gaurav johri)

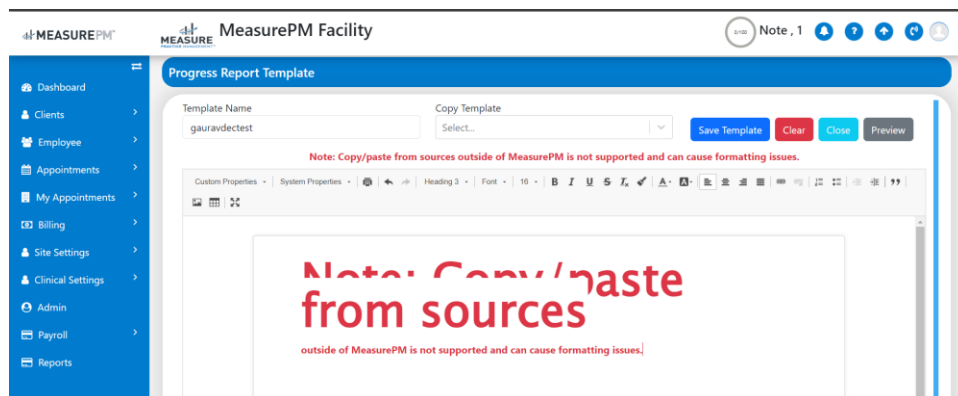

Note from Efrat. This is not an issue, it is a good thing! It gives more space for editing. It should also be available on the client generating report. Is this possible?

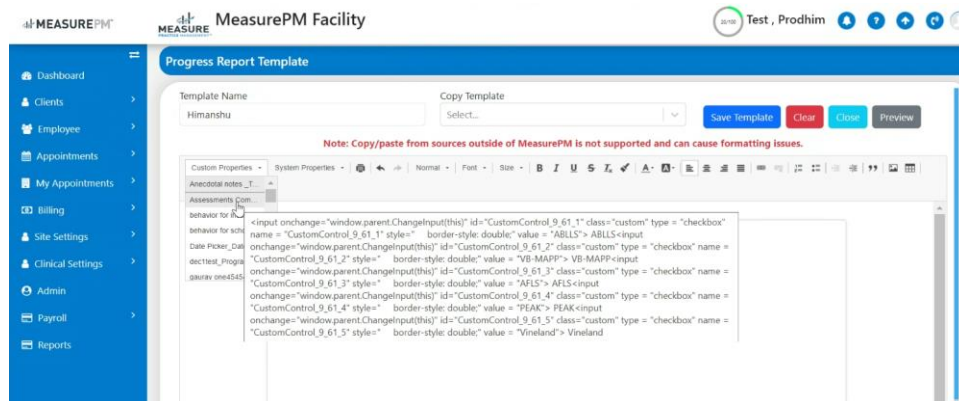

23. Paragraph format not working properly.(Gaurav johri)

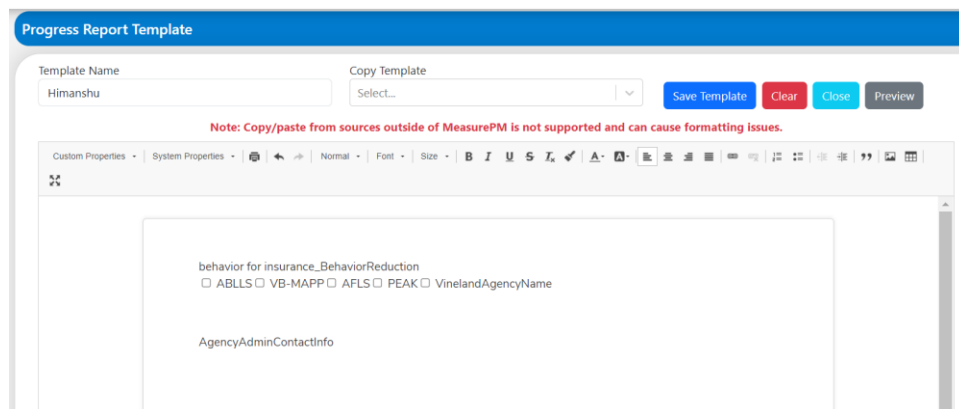

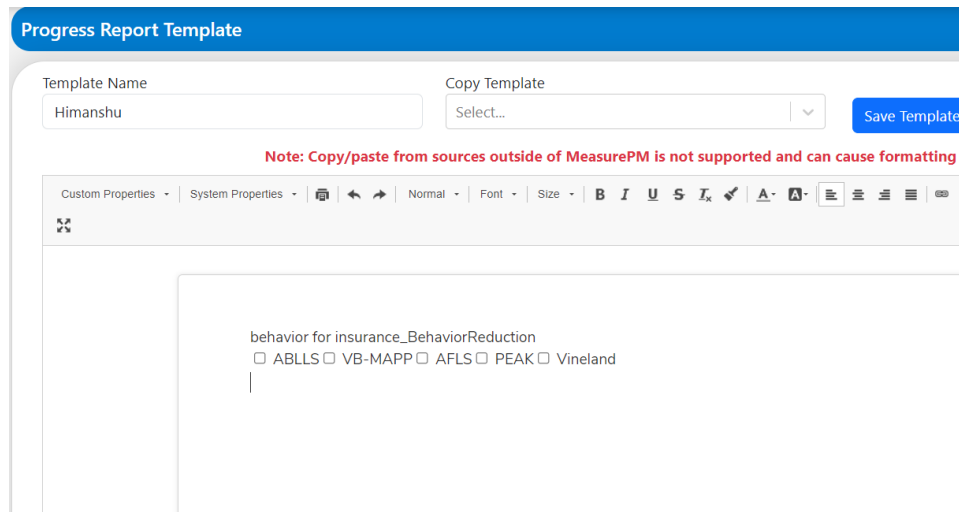

24. when font size is 72 it is overlapping (Himanshu pal)

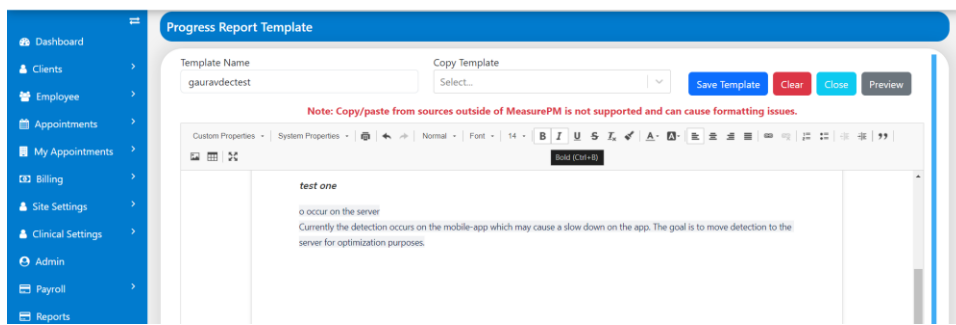

25. Mouse home over the system/custom properties showing this message. (Himanshu pal)

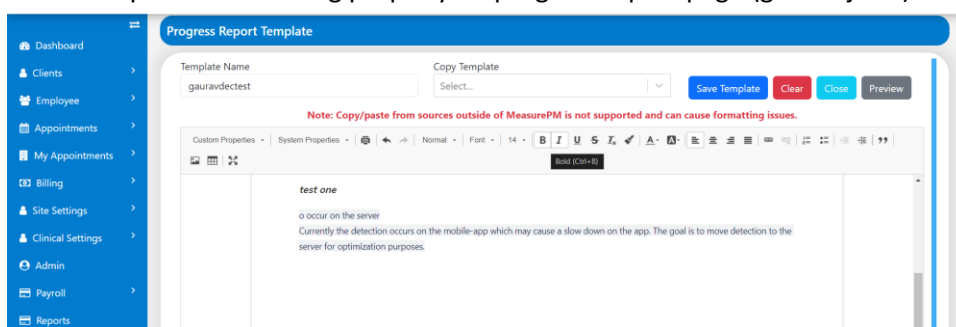

26. See the Corser Add the system property is add wrong please first time (Himanshu pal)

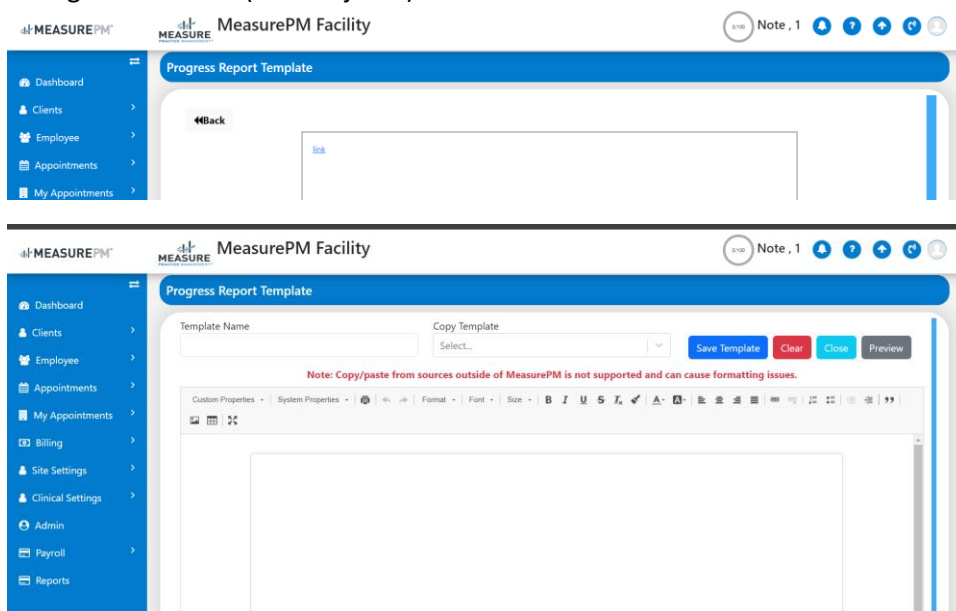

27. Bold option not working properly on progress report page.(gaurav johri)

28. Italic option not working properly on progress report page.(gaurav johri)

29. Whenever the user creates a new link and previews it and clicks on the link, then after going back all data gets removed. (Gauarv joihri)

30. Custom property is overlapping sign and text box (Himanshu pal)

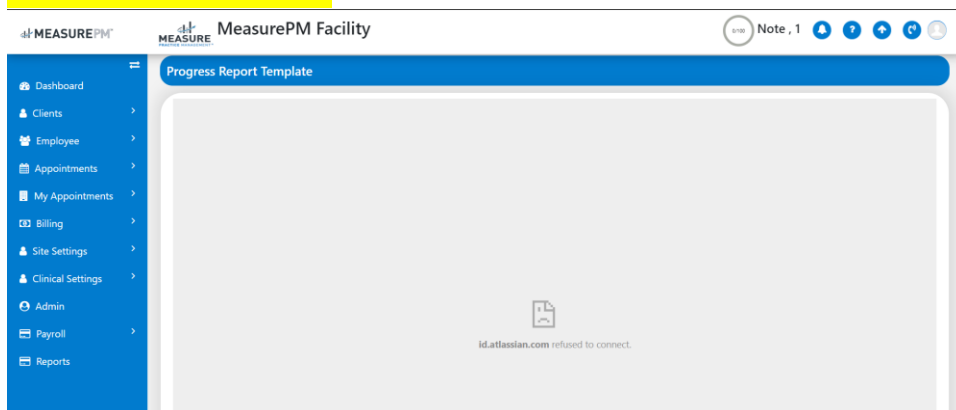

The screenshot shows a form with several elements. At the top, there is a text input field. Below it, the text "new prog._Program" is displayed. Underneath that is a checkbox. Below the checkbox is a dropdown menu with the text "--Select--". Further down, the text "Program test MK Oct 31_Programs" is shown, followed by "Programs_Program". A green "Sign" button is positioned in the center, overlapping with a text input field below it. The "Sign" button is a green rounded rectangle with the word "Sign" in white.

31. Abc checkbox is not showing correct for preview the tamplate(Himanshu pal)

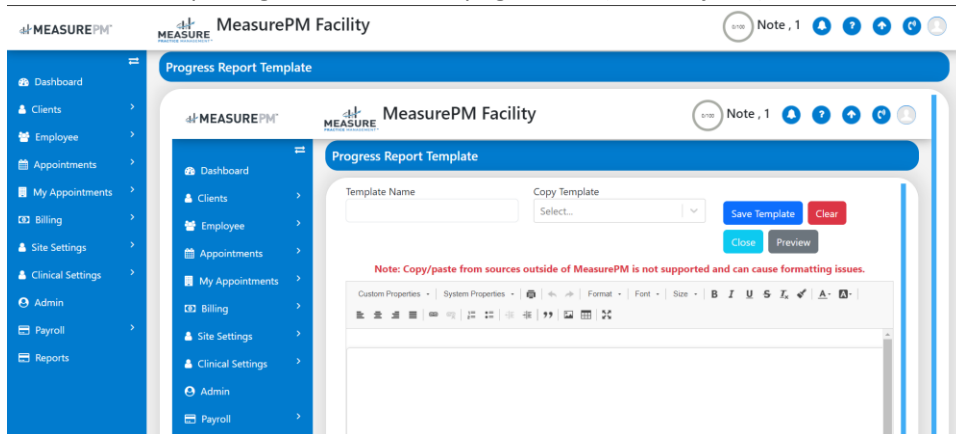

The screenshot shows a form with the following elements: "dec1test_Programs" followed by three checkboxes labeled "a", "b", and "c". Below these is the text "new prog._Program". A horizontal line is drawn under "new prog._Program". Below the line is the text "AgencyName". Below "AgencyName" is "dec1test_Programs" followed by three checkboxes labeled "a", "b", and "c". Below these is the text "new prog._Program". A horizontal line is drawn under "new prog._Program".

32. When i click on the link it is not opening.(Gauarv johri)

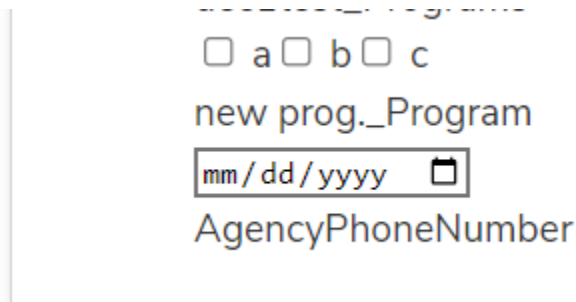

Note from Efrat: what link?

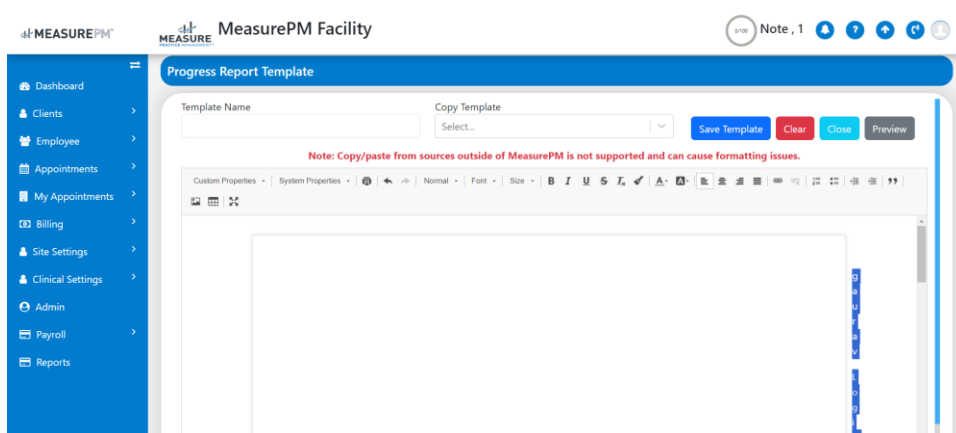

33. The link is opening on the Preview page itself. (Gaurav johri)

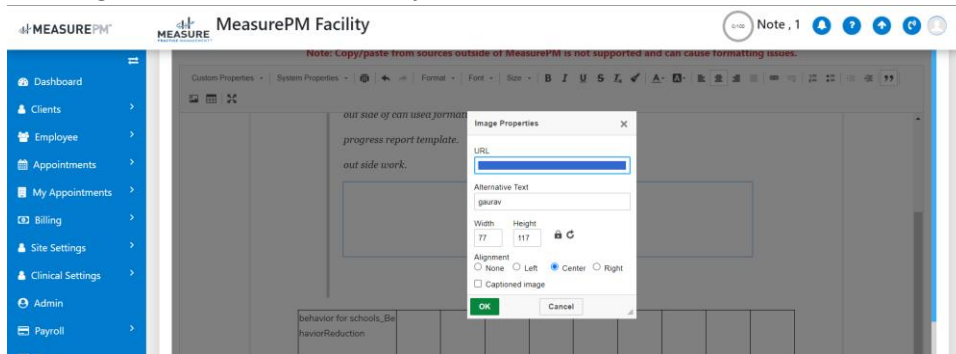

34. Date picker custom property is not working (Himanshu pal)

35. When the user use the Increase indent option, the Paragraph is being moved out of the sheet.(GAURAV JOHRI)

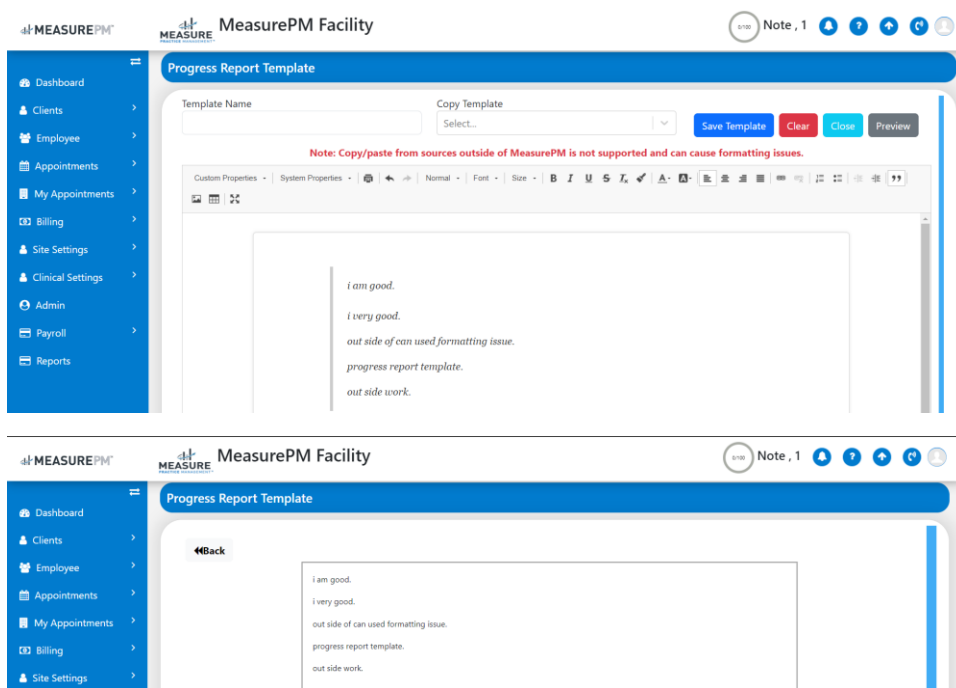

36. Image URL not visible.(Gaurav johri)

37. Block Quote is selected but not visible on Preview.(Gauarv johri)

Note from Efrat: Block quote is not something clinicians really need. Depending on the amount of work to fix this, you might want to hide it.

38. Border color is not working.(Gauarv johri)

41. Table text is not showing correct on preview. (Himanshu pal)

Technician Competencies

Purpose

The purpose of these competencies are to ensure a high level of procedural fidelity for optimal outcomes of services for our clients. They assess and determine areas of growth for our staff, and allow us to focus on individual learning opportunities.

Guidelines

When a technician is starting with a new client, their supervising clinician will conduct weekly assessments of procedural fidelity of each program being implemented with the client until a minimum of 90% fidelity is attained. Thereafter, at least one competency assessment (including assessment of procedural fidelity of programs being implemented with each client) will be completed per month for each technician for each client they currently work with. If a technician scores less than 100%, a recommendation for action to improve fidelity will be included with feedback. If a technician falls back under 90% fidelity during a monthly check, weekly assessment of procedural fidelity will resume until 90% is re-attained.

This data will be tracked and graphed in order to monitor the progress of each technician. All competency assessments will be stored in each client's database with access restricted to the management team in order to maintain confidentiality. All documents will be stored for at least 7 years.

Technician Name	
Date	mm/dd/yyyy
Client Name	1, chemical

51. Added by Efrat: Even when I place Company Logo in the center on the template, when I generate the report, it is placed on the left

52. Added by Efrat: When exporting to word and pdf, the custom properties are supposed to export as regular text, so that it is not clear to the viewer what was originally a system property, custom property, or text. This used to be the case before CK editor, but it seems now not to be.

53. Program custom properties are not going according to config

See only program for parent training is Collaborative Play.

See on report, even though only parent training is configured, it shows all, and for other property without parent training, all are showed too. Its disregarding the configuration for with statuses should show.

file:///Users/vbalaptop38/Downloads/programs%20test-2024-01-04_07-11-48-PM.pdf

This is not only for CK editor this also is the case for the old version, I am seeing now

Note from Efrat: Why are there no issues reported when exporting? It looks like exporting to word and pdf were not tested, even though that was specifically listed on the testing sheet we made a few weeks ago. Please retest exporting.
